A minimum of 24 points, but no more than 33 points, may be earned prior to the residency year. Fewer points may be required prior to starting the field education year if transfer credits from another graduate program have been granted.

### Residency Phase

During the residency year, students enroll in the method area practice courses, a field of practice course as determined by their field placement, a second-year research course, and any remaining electives. During this period, students attend school on a full-time basis during the day and complete 900 hours of field education, enrolling for 12 points over the year. Students may choose the three-day per week field education model, and take T6020 Field Education for 4 points in the Fall, Spring and Summer terms. Or they may choose the four-day per week field education model, and take T6020 for 6 points in the Fall and in the Spring. A four-day a week model is illustrated by method area below. See the *Field Education Manual* and Field Education section in the *Student Handbook* for more information.
